Building of a Toxas and Pacific Tap Railroad by Austin Divert Trade!-A

GALVESTON, January 4, 1875. The Texas and Pacific, as it runs, is a so long as we have our headquarters a th Washington, January 12. - Half a dozen as much capital as we possibly can; and the may get as much for his cotton if he sells of taxes to pay. We need to keep this capital invested here so that it will help us TALLAHASSE, 'Fla., January 8.-T. H. pay the expenses of the government. However, that is only a small amount of the benwealthy. We must have manufactories There are a hundred great interests to be developed; and every dollar which goes out of the State or is deterred from com here for want of proper encouragement lessens to that extent the chances of an early development of our resources. Every dol lar invested within the boundary lines, every factory built, makes the whole State so much richer. Every step in the direc-

value of our property.

It is to our interest then to prevent drainages. Every railroad should have a termi nus within the State. Our policy should be to bring in, not to carry out; handle all our produce at home and bring all we can will find the best investment. By inducing This all means that the Texas and Pacific

Railroad /hould have a terminus at Galves-But how are we to get it? We may go to work and build a branch road by way of Anstin; but after we shall have done that we have not accomplished the work we set about. The Texas and Pacific, it is well known, belongs to and is built with the intention of working to other railroads East. Will it bring the commerce of the Orient half-way across the continent and there drop it, leaving in the lurch the roads for whose express benefit it was built? These are questions which should receive our earliest attention. Experience has taught us that railroads can so arrange their tariffs as to direct freight into whatever channel they desire it. What reason have we to expec that the Texas and Pacific will sacrifice it self and its friends by stopping its freight at Galveston, instead of taking it on fifteen hundred miles further to New York? Then, we should not only think about

can compel the Texas and Pacific through line to play fair with us.

about devising some means by which we

calling attention to the duty we owe to immigrants and strangers coming to our city, and showing conclusively that our city may be largely increased in population by a judi-cious action in the premises, and if it will not be out of place I desire to make a suggestion. Let us have a mass meeting of our citizens this week at the May room, and take the necessary steps toward grants arriving in our city, and not prothe depreciation in value of leading bank pared to pay hotel bills, so that they may stances. I learn that the county author closely approximates the result: Bank part of the court house building, and that the city authorities have purchased and put up stoves, etc.; but, while this is all well ough, it is not enough. Let us do more:

are willing to act to look up and receive and kindly care for these people; and we can all resolve to extend to these strangers that courtesy and kindness which is more priceless to a stranger in a strange land then money or shelter.

If you will call this meeting, I feel assured that it will be largely attended and result in much good. I believe our people are at last learning to feel that they cannot prosper with hearts and purses both hormet-

to one. What a life of adventure is his has reason to believe that Bismarck has and, perchance, how delicious a martyrdom upon a field of uncullied snow within he naculate stocking of floory silk, fool that "if there is an elysium on earth it
